Foreword by Elizabeth King Gerlach	xi
Acknowledgments	xiii
Introduction	1
PART 1. UNDERSTANDING AUTISM	3-38
1. Facts About Autism.	5-16
In the Beginning.	5
Parents Need to Know	6
The Search for Information Begins	7
A General Definition of Autism	7
Unraveling the Labeling Maze.	10
Autism Spectrum Disorders.	10
Pervasive Developmental Disorders	10
Causes of Autism	12
Incidence of Autism	13
Value of Accurate Diagnostic Labels	14
Treatments or Cures.	15
Potential for Those with Autism	16
2. Understanding the Effects of Autism.	17-28
Understanding the Child's Perspective	17
Information Processing in Autism	19
Effects of Processing Differences	23
Final Thoughts.	27
3. Parents as Advocates.	29-38
Understanding Contradictory Information.	29
Guidelines for the Parent Advocate.	30
Sources of Information	37
Organizations.	37
Autism Bookstores	38
Autism Journals and Periodicals	38

PART 2. TREATMENTS AND SERVICES	39-55
4. Treatment Decisions	41-46
Treatment Options	41
Evaluating Treatments	42
5. Educational Services	47-55
Individuals with Disabilities Education Act (IDEA)	47
General Provisions of IDEA	48
Early Intervention (EI) Services	48
Special Education Services	48
Other Public Resources	52
Implications of Diagnostic Labels	52
Importance of Maintaining a History	53
PART 3. EDUCATIONAL INTERVENTIONS	57-108
6. Effective Early Intervention	59-66
Importance of Early Intervention	59
Effective Early Intervention Programs	60
Final Thoughts	64
7. Interventions and Procedures	67-86
The Foundations	67
Neurophysiological Approach	68
Information-Processing Approach	68
Cognitive/Developmental Approach	69
Behavioral Approach	69
Integrated Approach	70
Terminology	70
Two Instructional Formats	72
Discrete Trial Format	72
Incidental Teaching Format	74
Other Effective Procedures	74
Pivotal Response Training (PRT)	75
Structured Teaching	76
Teaching Functional Routines	76
Interactive Play Strategies	77
Picture Exchange Communication System (PECS)	78
Cognitive Picture Rehearsal (CPR)	78
Social Stories	79

Therapeutic Approaches	79
Speech-Language Therapy	79
Sensory Integration Therapy (SIT)	79
Facilitated Communication (FC)	80
Auditory Integration Training (AIT)	80
Computer Tutorial Programs	81
Other Therapies	82
Staff and Parent Training	82
Model Programs as Resources	83
Clinic for the Behavioral Treatment of Children	83
The Delaware Autistic Program (DAP)	84
Greenspan's Floor-Time Model	84
The Groden Center	84
Health Sciences Center, University of Colorado	85
The Judevine Center	85
LEAP Preschool	85
Princeton Child Development Institute	85
TEACCH Services for Preschool Children	86
8. Develop Your Child's Program	87-108
Guidelines for Making Decisions	87
Select the Major Long-Term Goal	93
Develop the IEP or IFSP	95
Assess Current Level of Functioning	95
Select Priority Goals and Objectives	96
Identify Support and Service Needs	97
Determine Class Placement	98
Identify Safety Needs	102
Home/School Conflicts	104
Establish Positive Relationships	108
PART 4. BASIC STRATEGIES	109-147
9. Strategies for Preventing Problem Behaviors	111-132
Understanding Behavior	111
The Effects of Stress on Behavior	113
An Underlying Principle	114

Strategies and Support Systems	115
The Interpreter—Provider of Critical Support	115
Matching Interventions to Needs	116
Preventing Problems	119
The Process for Defusing Stress	124
Strategies for Giving Directions	127
10. Strategies for Achieving Critical Goals	133-147
A Perspective of Teaching	133
Goals and Initial Strategies	134
PART 5. THE GIFTS	149-160
11. The Gifts of Autism	151-160
Intense Interests Provide Motivation	151
Artists with Autism	154
Poets with Autism	158
Index of Acronyms	161
Glossary	163
References	167

FIGURES

1. Summary of behavioral indicators of autism in young children . . . 8-9
2. Some of the conditions implicated as causes of autism 13
3. Example of differences in ability to solve problems 27
4. Treatments most commonly mentioned in the autism literature . . 42
5. Six critical goals that address the common deficits of autism 61
6. The sequence that is the foundation for all learning 68
7. The discrete trial format 73
8. Applications of the incidental teaching formats used in
natural context 75
9. Elements of a balanced program 92
10. Profile of stress: An illustration of the varying levels of
stress that ebb and flow over time 113
11. Profile of stress levels: The basis for matching interventions
to needs 116
