Section 5. Comments and Recommendations

Directions: Using the 5-point rating scale next to each item, rate your impression of the student relative to the item descriptor. Indicate your rating by circling the appropriate number. Do not place marks between two numbers. Base your rating on your knowledge of and experience with all the students you have known who are the targeted student's age. *Answer all items.* If uncertain about an item, delay rating until you have had time to observe the student more closely or ask another professional or parent about the item.
